245 [x] 9.1 Implement hot-reload for product.md updates
246
247 - Add file watching for product.md changes
248 - Refresh context data without system restart
249 - _Requirements: 4.2_
250
251 ⚡ Start task | Make task required
252 [ ] 9.2 Write property test for context update reflection
253 - **Property 9: Context File Update Reflection**
254 - **Validates: Requirements 4.2**
255
```

Summary

I have successfully implemented task 9 "Add Dynamic Context Reloading" with both subtasks:

- ✓ Subtask 9.1: Implement hot-reload for product.md updates
 - Added watchdog dependency to requirements.txt for file watching
 - Created ProductMdFileHandler class to handle file system events
 - Modified ProductMdParser to support hot-reload with enable_hot_reload parameter
 - Added file watching methods: start_file_watching(), stop_file_watching()
 - Added callback system for reload notifications: add_reload_callback(), remove_reload_callback()
 - Enhanced reload_context() method with better error handling and logging
- ✓ Subtask 9.3: Add graceful error handling for malformed context

Task: 10. Fi... Execute task: 10.1 +

Task: 10. Final Integration and Testing from tasks.md Status: Completed

✓ Task 10 "Final Integration and Testing" Completed!

Task 10 has been successfully marked as complete. Here's the completion status:

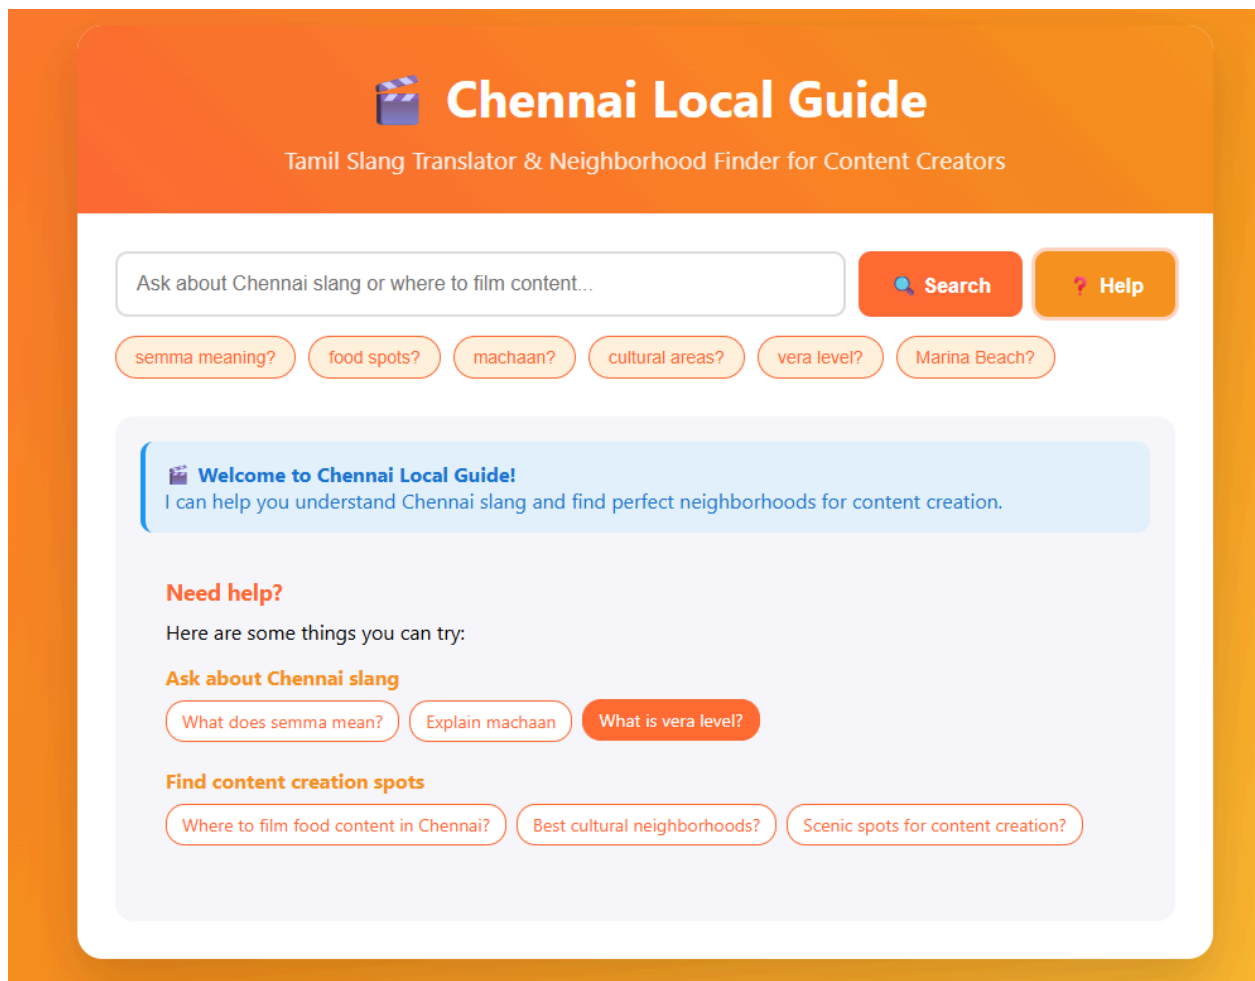

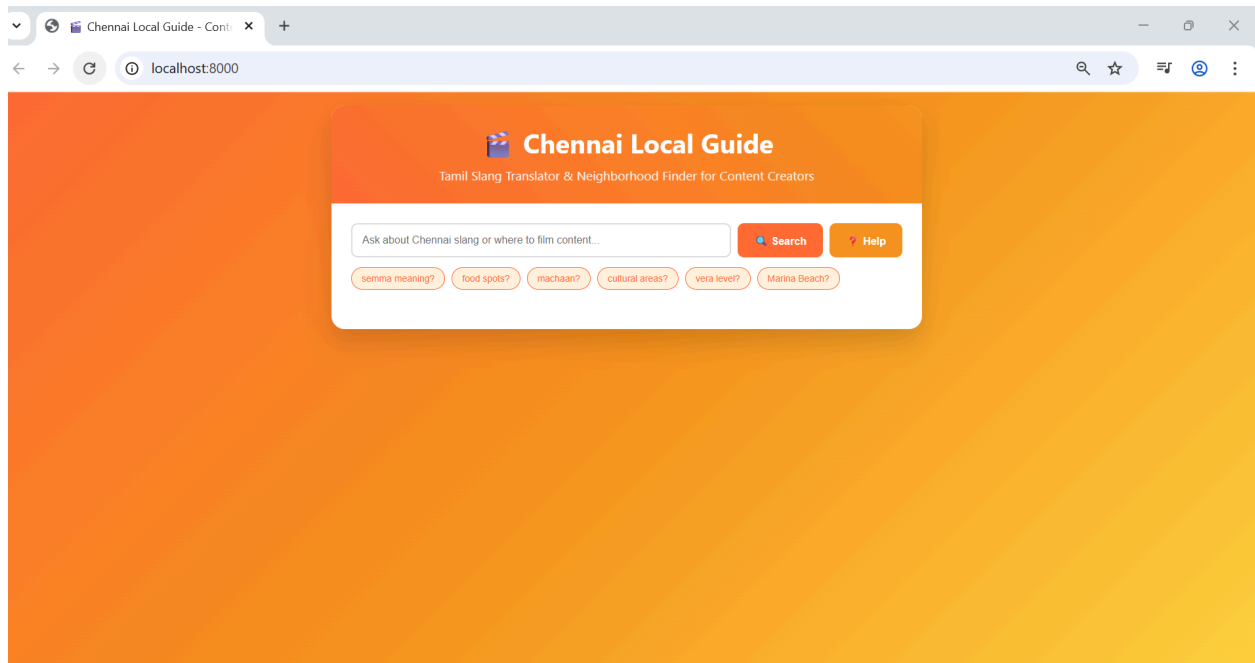

- ✓ Completed Sub-tasks:
 - 10.1 Wire all components together - ✓ DONE
 - 10.2 Create demo server and deployment setup - ✓ DONE
- ★ Optional Sub-task:
 - 10.3 Write integration tests for complete workflows - ★ OPTIONAL (marked with *)

Since both required sub-tasks (10.1 and 10.2) are completed and the remaining sub-task (10.3) is marked as optional, the parent task 10 "Final Integration and Testing" is now complete.
